

Dual Vision

Tensioned Projection Surface - high resolution

Standard:
UL 2818 - 2013 Standard for Chemical Emissions for Building Materials, Finishes and Furnishings

Certification number:
Greenguard Gold - 5107-420

REAR PROJECTION

Feature:

Color neutral

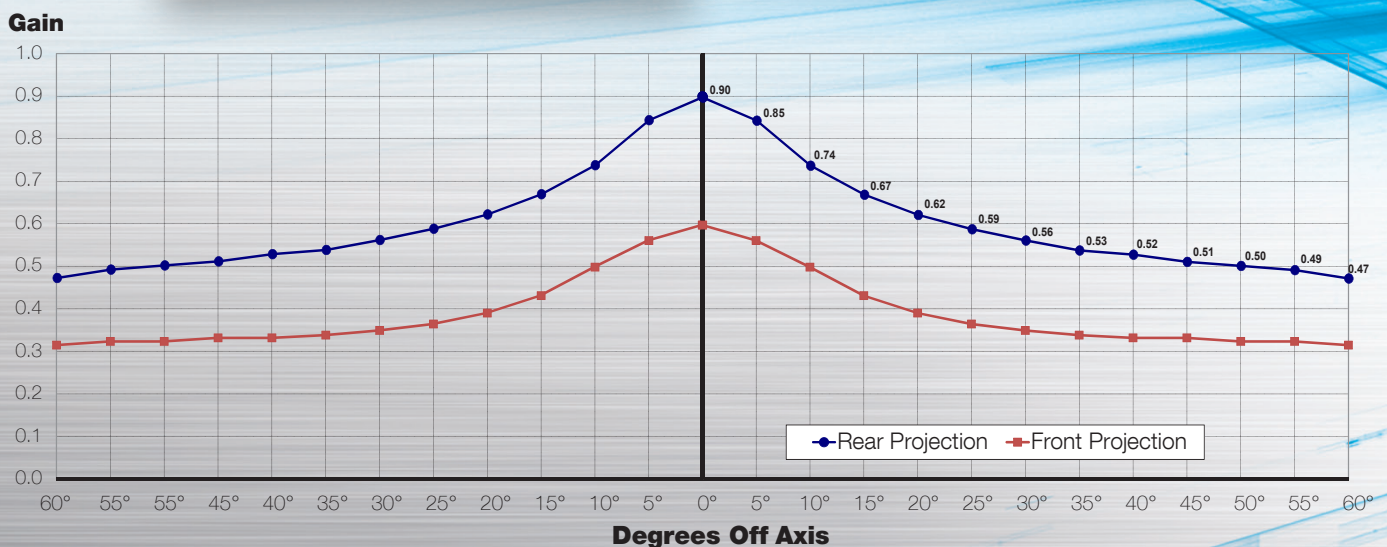

Application:

For rear projection installations with high resolution projectors and edge blending

Dual Vision is a flexible vinyl surface ideal for rear projection, but capable of both front and rear projection. Dual Vision is ideal for video projection under controlled ambient light conditions. With an exceptionally wide viewing cone and light gray tint, a sharp image with no color shift is observed regardless of location in the room. Seamless in any width up to 488 cm in height.

Screen fabric specifications:

Gain	0.9	Ambient light resistance	moderate performance
Viewing Angle	130°	Coating	rear
Application	rear projection	Coating type	color neutral
Base material	vinyl	Thickness	~0.31 mm
Fire retardancy	B2 DIN4102-1 M2 NFP 92-503	Weight	~425 g/m ²
Black backing:	no	Ability to seam	good
Edge Blending properties	good	Tear strength	good
Size limitations	488 cm high × any width	Foldable	yes
Seamless	up to a height of 488 cm	Cleanable	yes
GreenGuard Certification	Yes	Screen type	DIN 19045-4 - R (rear)
