

Matte White (Tensioned)

Tensioned Projection Surface - standard resolution

Standard:
UL 2818 - 2013 Standard for Chemical Emissions for Building Materials, Finishes and Furnishings

Certification number:
Greenguard Gold - 5100-420

FRONT PROJECTION

Feature:

Color neutral

Application:

A good and versatile screen material for a wide range of applications.

Tensioned Matte White is a unity gain vinyl surface with a smoother surface than non-tensioned Matte White. It features a white surface for good color reproduction for environments with controllable ambient light. Seamless in any width up to 488 cm in height.

Screen fabric specifications:

Gain	1.0	GreenGuard certification	yes
Viewing Angle	120°	Ambient light resistance	moderate performance
Application	front projection	Coating	front
Base material	vinyl	Coating type	color neutral
Fire retardancy	B2 DIN4102-1 M2 NFP 92-503	Thickness	~0.52 mm
Black backing:	yes	Weight	~530 g/m ²
Edge Blending properties	poor	Ability to seam	good
Opacity rating	> 99%	Tear strength	good
Size limitations	488 cm high × any width	Foldable	yes
Seamless	up to a height of 488 cm	Cleanable	yes
		Screen type	DIN 19045-4 - D (Diffuse)
